

FireCracker MATH
Promoting Love for Mathematics

FALL SEMESTER
Starts September 16th

**Berkeley | Piedmont |
 San Francisco | Lafayette**

Firecracker Math is for curious and challenge loving kids from 6 to 16.

Our program is based on the best traditions and classical methods of teaching mathematics. We introduce and explore math concepts from number theory, algebra, geometry, combinatorics, to probability and more. The focus is on problem-solving and logical reasoning techniques. Theoretical instructions are supplemented with practical exercises that employ games, brain teasers, and hands-on activities.

In our math classes we will show your child that math can be incredibly creative, exciting, and fun.

We offer small class sizes, experienced and enthusiastic teachers, and an individual approach according to each student's needs. Elementary, Intermediate, and Upper Division classes are \$325 for the entire semester. 10% sibling and multiple session discounts. Prorated rate for late enrollments (contingent on space availability). Private and Semi-private lessons available on request. Financial aid is available. Save with our parent referral program.

Open House: September 8th.
